Intent

This document is designed to augment your online learning experience and provide you with the opportunity to review and revise the content that has been discussed during the individual lessons of the course

Feedback

Please contact your WithYouWithMe RPA instructor if you have feedback on this document or any of your WYWM courseware.

Summary

During this RPA Analyst course, you've been taught the RPA delivery methodology and your roles within it as an RPA analyst.

The methodology covered off on Process Management, Organisation's functional requirements, process definition, POC and Pilot Programs, UAT, operational impacts, RPA strategy, RPA delivery management and change management and RPA implementation. You also learnt about common RPA analyst reports and documents. These include FRQs, PDDs, OIDs, RPA strategy documents, implementation plans and change management.

These are the learning objectives that we covered during the course are available in the slides provided. That concludes the RPA analyst course and covers all the content that you will need to approach an RPA analyst role with confidence in industry. The next lesson will be the RPA Analyst Course summary quiz.

Once you've finished a quiz, you will do the summative assessment for the module to test your ability to apply what you've learnt in real world scenarios. It's important for you to know that the case study that you will take part in is taken directly from industry, so please take the time to do the assessment to the best of your abilities in order to prepare for industry life.

Upon completing the summary quiz and the practical assignment you'll have completed this course. It's time to move on to the RPA Developer phases of training where we start to build bots. Thanks for participating in this course and see you next time.
